

## SECTION XV

### IMPLEMENTATION STEPS

Implementation of this *Pennridge Water Resources Plan* requires a commitment from the municipalities involved, competent professional consulting assistance, and adequate funding. In order to lay down a road map of how to achieve the recommendations presented in Section XIV, a detailed Phase III—Implementation scope of work and cost estimate was developed and is presented in **Table XV-1**. The recommendations of this Plan will be implemented over the two-year period, July 1, 2002 through June 30, 2004. **Figure XV-1** presents the time line for each stage of plan implementation. **Table XV-2 Grants Summary Chart** summarizes the current status of the various funding sources for Phases I, II, and III of the *Pennridge Water Resources Plan* and its implementation process.
